WHO WE ARE

Plocamium Holdings is an **operations-first direct investor and value-creation firm** for global industrials, healthcare, and defense markets – roughly **80% operational transformation and strategic services**, and **20% direct middle-market investment** worldwide.

LEGACY

A **70-plus-year** operating and investment lineage rooted in fabricated metal products and diversified manufacturing – the foundation for disciplined capital deployment in complex, volatile, and capital-intensive environments.

OUR VALUE ADD

An integrated value-creation framework spanning strategy, operations, growth, and capital discipline – applied from the executive suite to the production floor.

Strategic & Capital Guidance

Data-driven diligence across financial, macro, policy, and competitive dynamics – shaping capital allocation, positioning, and the execution priorities that build durability and enterprise value.

Operational & Performance Improvement

Hands-on productivity and operating-leverage programs – process optimization, management cadence, and KPI design that convert measurably into cash flow and operating performance.

Growth, Brand & Cash Generation

Compliant, performance-oriented growth infrastructure – narrative & capital-markets positioning and regulated-industry growth marketing, engineered for long-term competitiveness.

DELIVERED THROUGH RDLB | 1ness Strategies

TARGET MARKET & PARTNERS

Where we invest and operate

We focus on high-quality middle-market companies – often **family-owned or founder-led** – at inflection points of growth, succession, or operational complexity, with enterprise values from **$10M to $250M**.

We partner with **institutional capital, middle-market private equity sponsors, growth enterprises, and entrepreneurs** across North America and select developed international markets.

PRIMARY SECTORS OF FOCUS

- Healthcare Technology & Services
- Defense Technology & Machinery
- Containers & Packaging

OUR APPROACH

Immersive. Execution-led.

We underwrite with **data discipline and operational rigor** – deep, on-site diligence to identify performance gaps, then targeted value-creation plans executed alongside management at the plant and process level. Increasingly, we apply **AI-enabled diligence and operating tooling** where it compounds returns and shortens the path from insight to measurable productivity, efficiency, and scalability.

ABOUT US

New York–based. We apply an operations-first approach across strategic investments and advisory engagements – building durable businesses and aligned, long-term outcomes with sponsors and entrepreneurs.
